The Maryland Wellness Policies & Practices Project

The mission of the Maryland Wellness Policies and Practices Project (MWPPP) is to enhance opportunities for healthy eating and physical activity for Maryland students by helping schools and school systems create and implement comprehensive wellness policies.

The MWPPP employs a continuous quality improvement model to assess wellness policy implementation in schools throughout Maryland. The MWPPP conducts biennial evaluations, develops system-level recommendations, and provides technical assistance to school systems.

The MWPPP is a statewide initiative by the Maryland School Wellness Partnership, and includes the:
- University of Maryland School of Medicine
- Maryland State Department of Education
- Maryland Department of Health

Background

The federal government requires school systems participating in federal child nutrition programs to meet the regulations in the Healthy, Hunger-Free Kids Act of 2010. These regulations required school systems to update and expand their school wellness policy by June 2017.

An effective wellness policy can improve food choices, dietary intake, and physical activity for children in schools. However, to be effective, a wellness policy must be implemented, monitored, and assessed.

This report provides information on the implementation of school wellness policies and practices in Worcester County. All Maryland recommendations are built around three themes:

1. BUILD
2. COMMUNICATE
3. MONITOR

THE MWPPP TIMELINE

- System Data Briefings Winter/Spring '14
- System Data Briefings Winter/Spring '16
- System Data Briefings Winter/Spring '18

- MWPPP Survey #1 Summer '13
- MWPPP Survey #2 Summer '15
- MWPPP Survey #3 Summer '17

2012-13 School Year 2013-14 School Year 2014-15 School Year 2015-16 School Year 2016-17 School Year 2017-18 School Year
SECTION 1: WELLNESS POLICY UPDATES

Federal regulations require school systems to expand the scope of their wellness policies. As of June 2017, wellness policies must:

Leadership
- Establish policy leadership to ensure each school complies with the wellness policy

Public Involvement
- Permit public participation in the development, review, and update of the policy

Assessments
- Complete triennial assessments on: (1) policy compliance, (2) how the wellness policy compares to model policies, and (3) progress in attaining policy goals

Goals
- Include goals for physical activity, nutrition promotion and education, and other school-based activities that promote student wellness

Public Updates
- Annually inform the public on policy content and implementation

Food and Beverage Marketing
- Limit marketing and advertising to include only foods and beverages that meet Maryland Nutrition Standards for All Foods Sold in Schools (which incorporate federal USDA Smart Snacks Standards)

Nutrition Guidelines
- Specify nutrition guidelines for all foods and beverages sold in schools consistent with federal and state regulations
- Include guidelines for all foods and beverages provided, but not sold to, students throughout the school day

Throughout this report, data aligned with federal regulations will be marked by the following icon:

SECTION 2: SYSTEM-LEVEL RECOMMENDATIONS

Evidence suggests schools that perceive system support are more likely to implement their written wellness policy. Maryland has 10 evidence-based recommendations to promote wellness policy implementation. These recommendations are listed below.

BUILD
1. Maintain a system-level school health council
2. Identify funding to support policy implementation
3. Communicate implementation plan to the public
4. Train staff to support policy implementation

COMMUNICATE
5. Report policy goals to local school board
6. Communicate system-level wellness initiatives to school-level wellness councils
7. Communicate progress in wellness policy implementation to the public

MONITOR
8. Hold regular policy meetings to review current policies
9. Measure semi-annual or annual progress in achieving system wellness goals
10. Provide technical assistance for the evaluation and reporting of policy implementation

Throughout this report, data aligned with Maryland’s recommendations for school systems will be marked by the following icon: 🦋
In 2016-17, we asked administrators whether they were aware of their system wellness policy:

- **92%** were aware of and read their system wellness policy
- **8%** were aware of but did not read their system wellness policy
- **0%** were unaware of their system wellness policy

### SECTION 4: SCHOOLS’ PERCEPTION OF SYSTEM SUPPORT FOR WELLNESS POLICY IMPLEMENTATION

The MWPPP survey asked school administrators about **system-level support** for school wellness initiatives.7

Schools perceive that their school system divides their wellness efforts equally between **students and staff**

50% of schools perceive that their system **had a mechanism to encourage community or public involvement** in wellness efforts

2016-17 school year

WORCESTER COUNTY | 3
SECTION 5: WELLNESS POLICY IMPLEMENTATION IN SCHOOLS

Maryland has 5 evidence-based recommendations to promote wellness policy implementation.

**BUILD**
1. Establish a school-level wellness team; appoint a coordinator
2. Develop school wellness goals and an implementation plan connected to school improvement team goals
3. Identify resources to implement wellness policy priorities

**COMMUNICATE**
4. Communicate and promote the importance of healthy eating and physical activities for students, families, and the community

**MONITOR**
5. Gather and report school-level data on wellness policy implementation

The MWPPP survey asked school administrators about school-level wellness policy implementation. 7

<tr>
<td>Provided opportunities to integrate physical activity during classroom instruction for content such as math, science, music, and fine arts</td>
<td>18%</td>
</tr>
<tr>
<td>Did not permit staff members to use food and/or beverages as a reward for academic performance or good behavior</td>
<td>9%</td>
</tr>
<tr>
<td>Promoted healthy choices by marketing healthy choices in school-wide activities, back-to-school events, etc. and/or including messages related to physical activity and nutrition promotion in school announcements</td>
<td>36%</td>
</tr>
<tr>
<td>Did not permit the marketing of foods and/or beverages that do not meet Maryland Nutrition Standards for All Foods Sold in School (which incorporate USDA Smart Snacks Standards)</td>
<td>36%</td>
</tr>
</tbody>
</table>

### Schools addressed food celebrations by...

- Limiting the number of food celebrations (17%)
- Allowing only foods that meet Maryland Nutrition Standards for All Foods Sold in Schools (17%)
- Not permitting food celebrations (0%)

2016-17 school year

### Schools promoted or supported walking and bicycling to school by...

- Using crossing guards (67%)
- Providing secure storage facilities for bicycles and helmets (50%)
- Designating safe or preferred routes to school (50%)
- Providing instruction on walking and bicycling safety to students (50%)

2016-17 school year
This section presents data on evidence-based practices among the 12 schools that reported having a wellness team in the 2016-17 survey.

Schools included the following members in their wellness team:

- **Teacher (Non-PE/Health):** 83%
- **PE Teacher:** 92%
- **Administrator:** 83%
- **Nurse:** 58%
- **School Counselor:** 8%
- **Health Teacher:** 33%
- **Parent:** 25%
- **Student:** 8%

The majority of wellness leaders volunteered their time.

**Compensation**

- Volunteered, 56%
- Earned money, 30%
- Released from other duties, 14%
- Add/plan time, 0%

**School Improvement Team**

- SIT member on wellness team: 3
- Wellness team is subcommittee of SIT: 4
- Wellness team & SIT are the same: 5
- Wellness team not integrated into SIT: 6

**Involving the Public**

**Worcester County | 6**
The Whole School, Whole Community, Whole Child (WSCC) model fosters a collaborative approach to improve educational outcomes and health in schools nationwide. The WSCC model is a framework for wellness teams to prioritize their approach to holistic school health.

The WSCC model, displayed on the right, is made up of 10 components. Within each component, the numbers represent the percent of wellness teams that set goals consistent with each component of the WSCC.

Throughout Worcester County,

- **100%** of wellness teams set goals for Employee Wellness
- **92%** of wellness teams set goals for Physical Education & Physical Activity
- **58%** of wellness teams set goals for Social & Emotional Climate
- **50%** of wellness teams set goals for Health Education
- **42%** of wellness teams set goals for the Nutrition Environment & Services

**Notes and References**

3. Unless otherwise specified, this report only presents survey responses that are “fully in place” in comparison to all other responses (“partially in place,” “under development,” “not in place,” and “don’t know”). Additional information on MWPPP data collection (as well as the full 2016-17 survey) will be made available on www.marylandschoolwellness.org in Spring 2018.
4. The MWPPP conducted evaluations focusing on the 2016-17 school year. Survey responses include data prior to the federal regulation June 2017 updates.
7. Schools who responded to this survey may not be representative of every school in Maryland. Schools who responded to this survey varied between the MWPPP Survey #1 (2012-13), the MWPPP Survey #2 (2014-15), and the MWPPP Survey #3 (2016-17). Additional information on MWPPP data collection (and the 2016-17 Survey) will be made available on www.marylandschoolwellness.org in Spring 2018.
11. The Maryland Wellness Partnership recommends the utilization of a customizable reporting tool that will be made available by the Maryland Wellness Partnership in Spring 2018.
